

COUNCIL CENTREFOLD 305 HENDERSON

80kg

Wood

Interior

For centre folding wooden partition doors weighing up to 80kg

Overview

Catering for wooden doors weighing up to 80kg, Council Centrefold offers a high quality top hung system designed for centre folding partition doors. Council Centrefold can accommodate up to seven full doors and one half door hinged to the post. When using floating units, configurations must consist of five, seven or nine full doors and have a minimum clearance of 2mm between them.

Council Centrefold has been designed to allow for access doors in the form of a swing or wicket door contained within one of the doors. It is essential that all doors are of equal width and the door leaves should be constructed to provide secure fixing for hangers, hinges and guides. The doors can be flush, panelled or glazed.

Features and Benefits

- Caters for doors weighing up to 80kg
- Suitable for residential and light commercial folding partitions
- Doors are hung centrally
- Doors can fold to one or both sides of the opening
- To cover any width of opening, any number of folding units can be used
